New Features & Enhancements

1.00.00

- TEKLYNX CENTRAL GHS is designed to specifically address GHS and other compliance requirements.
- SENTINEL, CODESOFT Enterprise, LABEL ARCHIVE Server, LABEL ARCHIVE Client, and LABELNET are automatically installed when you install TEKLYNX CENTRAL GHS.
- The user is only prompted once to enter database information during TEKLYNX CENTRAL GHS installation.
- A watch and watch folder (C:\watch) is automatically created in SENTINEL for LABELNET during TEKLYNX CENTRAL GHS installation. The default configuration for LABELNET sends print requests to C:\watch.
- Each TEKLYNX application configuration screen opens in a new window.
- TEKLYNX CENTRAL GHS prompts for a user name and password when the application is launched. The user will not need to re-enter their login information when launching LABEL ARCHIVE Client, LABEL ARCHIVE Server, LABELNET, or CODESOFT.
- TEKLYNX CENTRAL GHS allows users to enter their SMA number within the application.
- TEKLYNX CENTRAL GHS displays the total number of application licenses for administrators, label designers, print users, report users, and printers.
- TEKLYNX CENTRAL GHS users can update their licenses using a single tool for all license types.
- Users can select a workstation on their network and install both CODESOFT Network Client and LABEL ARCHIVE Client simultaneously. When a user installs CODESOFT and LABEL ARCHIVE, TEKLYNX CENTRAL GHS automatically configures both applications to point to the TEKLYNX CENTRAL GHS server.
- You can view status updates of all remote installations within TEKLYNX CENTRAL GHS.

Fixed Defects

Version	Ticket ID/ Defect ID	Description
1.00.00		
	None	None

[Back to Top](#)

Known Limitations

- The License Server requires you to restart LABEL ARCHIVE Server and UMSS services.
- Remote installation requires administrative privileges on the target computer.
- The installation of TEKLYNX CENTRAL GHS in a remote session on Windows Server 2003 or Windows Server 2003 R2 may be interrupted. For more information, visit <http://support.microsoft.com/kb/2020855>. To fix this, either run the installation directly on the server instead of through a remote desktop, or use the following command line to launch the client: MSTSC/admin.
- To uninstall TEKLYNX CENTRAL GHS, use the Remove TEKLYNX CENTRAL GHS shortcut instead of the Add/Remove Programs option in the Windows control panel. A manual intervention will be needed to uninstall LABEL ARCHIVE Client and LABEL ARCHIVE Server.
